- Express/Socket
- NoSQL/SQL
- APIs
- Photoshop/Figma
- Networks
- CI/CD

EDUCATIONS

Changemaker Educations
Frontend & App Developer
2021-2023

NTI
Foundation year in natural science
2014-2015

SUMMARY

I have been into tech since I was a kid.
Gaming, computers, consoles, building stuff that does not make sense (made from stuff that made sense), figuring out how to use and alter most software etc.
Almost in every roll that I've had professionally I have been involved in the tech/IT as much as I could.
I'm a front-end student and I find everything full-stack interesting. Long term I hope to become a senior full-stack developer working with all the newest technologies, and even creating them.

WORK EXPERIENCE

Cell Solar Nordic AB

Directly collaborated with CEO and board of directors from the startup. Built this company from nothing to one of Swedens leading Solar Energy companies.

- Sold over 100 installations directly
- Went from 300K to 90 million SEK in revenue
- Developed standards in the solar market in Sweden
- Created techniques for sales and development
- Technology, product and product development lead

Pinevision Design Studios

Their owner and CEO developed a CMS-tool that we built a company around. I helped them get started in the first year with building and structuring all the departments while getting sales going.

- Built the company from scratch
- Created our own CMS-tool
- Onboarded and trained customers and personnel
- Designed sites and logos

Evil Table Poker

Developed technology togheter with Connected Table to be able to play poker IRL through screens which made it legal in Sweden. Touch screens integrated in real poker tables. Had players playing for us and and a club for gambling.

- Organized tournaments offline and online
- Had international players playing for us
- Developed our own hardware and software
